

Proceedings: National Watershed Water Quality Project Symposium

FOREWORD

The lessons learned from watershed projects addressing nonpoint source problems are recorded in these proceedings of the National Watershed Water Quality Project Symposium, held September 22-26, 1997, in Washington, DC. The Symposium was conducted by the: U.S. Environmental Protection Agency, U.S. Department of Agriculture; Cooperative State Research Education & Extension Service, Natural Resources Conservation Service, *Maryland Department of Natural Resources*, and Conservation Technology Information Center (CTIC). The Symposium featured accomplishments of local projects funded under EPA's Section 319 (Clean Water Act) National Monitoring Program and USDA's Demonstration, Hydrologic Unit Area Programs, and Management Systems Evaluation Areas. The symposium also featured lessons learned in the Farm*A*Syst and Home*A*Syst programs.

ACKNOWLEDGMENTS

The success of the symposium and the information transferred from it and the proceedings is due to the expertise and efforts of many individuals. The sum of these are greater than the each individual part and will hopefully be multiplied many times.

Authors

A special thanks goes to the many authors of the papers and abstracts presented in this document. Their efforts in paper preparation and editing made this document possible.

Peer Review

Numerous individuals were involved in the peer review process, too numerous to list, but their invaluable insights and comments *improved* the scope and direction of each of the papers that they reviewed.

Program Committee

Appreciation goes out to those individuals on the committee that represented their organizations in planning the program. Their tireless efforts provided insight to the agenda and the tours.

Jack Clausen, University of Connecticut, Storrs, Connecticut
Tom Davenport, U.S. Environmental Protection Agency, Chicago, Illinois
Steve Dressing, U.S. Environmental Protection Agency, Washington, D.C.
Gary Jackson, University of Wisconsin, Madison, Wisconsin
Lyn Kirschner, Conservation Technology Information Center, West Lafayette, Indiana
Pat Lietman, U.S. Geological Survey, Harrisburg, Pennsylvania
John McCoy, Maryland Department of Natural Resources, Annapolis, Maryland
Don Meals, University of Vermont, Montpelier, Vermont
Dan Murray, U.S. Environmental Protection Agency, Cincinnati, Ohio
Deanna Osmond, North Carolina State University, Raleigh, North Carolina
Lynette Seigley, Iowa Geological Survey, Iowa City, Iowa
Dan Smith, USDA Natural Resources Conservation Service, Washington, D.C.
Jean Spooner, North Carolina State University, Raleigh, North Carolina
Dave Rathke, U.S. Environmental Protection Agency, Denver, Colorado
Mary Ann Rozum, USDA Cooperative State Research Education & Extension Service, Washington, D.C.
